

CYPRESS

# 64Mb to 256Mb 3.0-V Quad SPI FL-L NOR Flash Memory With 4KB Uniform Sector Size

## INTRODUCTION

The Cypress FL-L NOR Flash Memory family consists of the fastest Quad Serial Peripheral Interface (SPI) NOR Flash devices with 4KB uniform sector size for high-performance embedded systems. The low-pin-count Quad SPI reduces package sizes and enables a simplified board layout. Read bandwidth of up to 67 MBps ensures fast program execution for high-performance systems. A 4KB uniform sector size provides maximum flexibility for storing program code and parametric data, while improving the efficiency of memory usage. Cypress applies stringent testing and qualification processes to ensure all parts meet our world-class quality requirements. In addition, all FL-L NOR Flash memory family devices receive AEC-Q100 qualification and feature the extended temperature range of -40°C to 125°C.

## REDUCED PCB AREA AND COMPLEXITY

Cypress FL-L NOR Flash products save board space by utilizing a low-pin-count Quad SPI which enables package sizes as small as 16 mm<sup>2</sup>

## ADDED SECURITY FEATURES

Register protection, region protection, and additional security regions outside of the main flash array offer un-paralleled data security

## HIGH READ BANDWIDTH

Cypress FL-L NOR Flash products offer high read bandwidth of up to 67 MBps

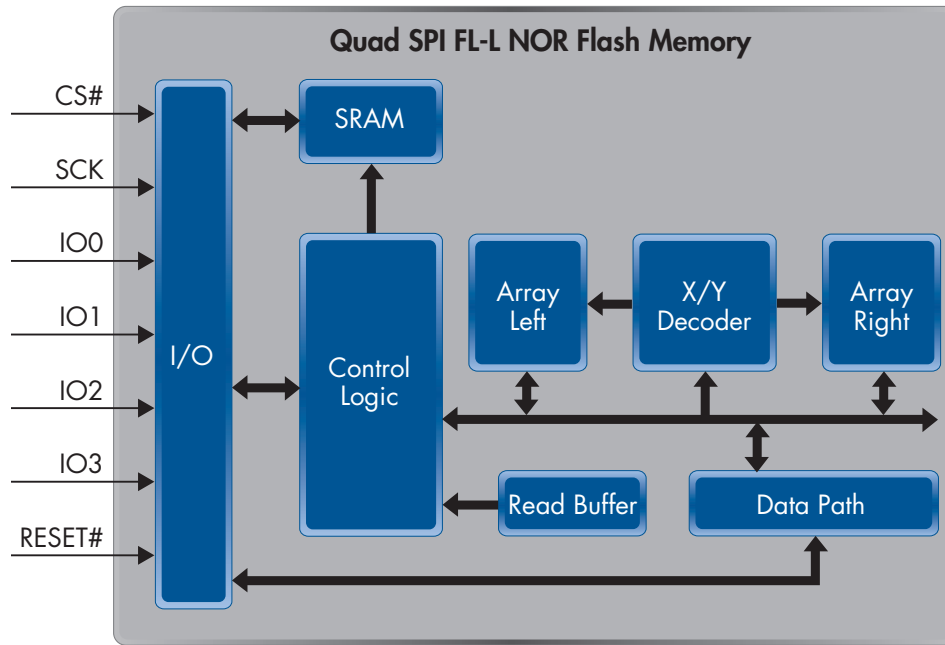

## 4KB UNIFORM SECTOR SIZE WITH FAST PROGRAM AND SECTOR ERASE TIMES

- A uniform 4KB sector size provides maximum flexibility for storing program code and parametric data
- As little as 300  $\mu$ s Page Program (256B) time (typical) increases manufacturing throughput
- Sector Erase (4KB) time (typical) as low as 50 ms enables new data to be written quickly

## TARGET APPLICATIONS

- Video Game Consoles
- Advanced driver assistance systems (ADAS)
- Automotive instrument clusters and infotainment systems
- Networking devices
- Set-top boxes
