# MACHINE LEARNING

Instead of writing code, you feed data to the algorithm and it builds its own logic.

Has an APEX.

“Hole” in the middle,  
usually triangular,  
could be other  
shape.

Has a bridge  
between sides

Has 2 “feet”  
(sometimes ‘pins’)

“ what a computer is to me is the most remarkable tool that we have ever come up with, it’s the equivalent of a bicycle for our minds.

Steve Jobs

**if a computer is the bicycle for our minds, machine learning is the bicycle for analytics.**

Humans are too good at recognizing faces and see them in everyday objects.

DEMO

As neural networks go deeper, they provide a dramatic increase in accuracy.

Higher accuracy networks **require** way **higher** computation which **increases** prediction latency.
