

Power Sequencing with Intel MAX10

Get familiar with power sequencing and the ready made solution available from Intel

Dear valued Customer,

In times of fast evolution, staying at the cutting edge of technology is only achievable by continuous learning. With this seminar, Arrow provides you the chance for a job specific training.

In this webinar we will talk about the importance of Power Sequencing for modern CPUs, MPUs and FPGAs. We take a look at the available IP from Intel for the MAX10 family and will fire up the Quartus Prime software to show how easy it is to get a power sequencer configured to meet your applications needs.

Speaker

Gerhard Nedok (MDE, Arrow)

Agenda

10:00 - 10:05	Welcome
10:05 - 10:20	Introduction to Power Sequencing
10:20 - 10:30	Intel Power Sequencer IP
10:30 - 10:50	Live Implementation in Quartus Prime
10:50 - 11:00	Questions & Answers
