

Freedom, flexibility and scalability with eSIM – Discover global cellular connectivity powered by ST4SIM and Arkessa

2021-05-20 – online

In times of fast evolution, staying at the cutting edge of technology is only achievable by continuous learning. With this seminar, Arrow provides you the chance for a job specific training.

Join Arrow Electronics, STMicroelectronics and Arkessa to discover ST4SIM – the global eSIM connectivity solution driving international scale, supporting diverse deployment models and providing commercial flexibility for various connected applications all over the world.

Tune in for the latest insights on eSIM and the applications it supports and gain access to and evaluate a complete eSIM solution through Arrow, available today. The webinar will include a practical demo and a Questions & Answers session.

Speakers: Agostino Vanore (Product Marketing Manager, STMicroelectronics)
Iain Warner (Senior Engineering Manager, Arrow Electronics)
Paul Donaldson (International Sales Director, Arkessa)

Language: English

Prerequisites: None

Seminar Actions: Presentation, Software Demo

Contact Person: Stefano Silvestri, ssilvestri@arroweurope.com, +39 34 77 40 38 28

Agenda (Time zone: CEST)

16:00 – 16:05	Welcome
16:05 – 16:35	Panel discussion including latest insights on eSIM
16:35 – 16:50	Practical Demo
16:50 – 17:00	Questions & Answers
