Subject: United States Trade Representative Statutory Review of China 301 Tariffs

Dear Valued Customer,

On September 13, US Trade Representative Finalized China Tariffs passed and confirmed increased tariffs on certain products imported from China. The list includes 34 HTS classifications of China origin that will be increased from their original 2018 tariff rate. The second list of 258 HTS classifications will remain in place from the 2018 tariff decision.

We recognize the impact these tariffs have across the industry. We are working with industry trade organizations and our supplier partners to implement the changes while minimizing disruption within the supply chain. Additionally, we continue to advocate for shifting supply chains out of tariffed regions.

Most tariff increases will be effective January 1, 2025. Arrow is collaborating with impacted suppliers to understand how they will pass along these new tariffs. We expect suppliers to pass along 100% of the tariffs, as has been customary in the past. Arrow will pass along the tariff increases beginning on the effective date.

If additional details are made available, Arrow will use reasonable efforts to pass through applicable details to you.

We appreciate your continued support as we navigate these unprecedented changes in our industry.

Sincerely,

A handwritten signature in black ink, appearing to read "Marc Gsand".
